Jane Massay Licata
Jane Massay Licata Registration No. 32,257

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

REPLY TO RESTRICTION REQUIREMENT

This reply is to the Restriction Requirement mailed
March 25, 2004, setting a one (1) month statutory period for
response.

Remarks begin on page 2 of this paper.

Attorney Docket No.: RTS-0343
Inventors: Cowser and Frier
Serial No.: 10/023,782
Filing Date: December 17, 2001
Page 2

REMARKS

Claims 1-20 are pending in the instant application. The Examiner has acknowledged that the Preliminary Amendment (filed February 20, 2003) which canceled claim 3 and amended claim 1 such that claim 1 recites the target sequence is considered to be responsive to a restriction requirement as the amended claims recite only one sequence. However, the pending claims have been subjected to a further restriction under 35 U.S.C. §121 as follows:

Group I, claims 1-14, drawn to antisense compounds targeted to TFAP2C, classified in class 536, subclass 24.5.

Group II, claims 15-20, drawn to methods of inhibiting the expression of TFAP2C, and to methods of treating an animal comprising the use of antisense compounds targeted to TFAP2C, classified in class 514, subclass 44.

The Examiner suggests that Groups I and II are related as a product and process of use. It is suggested that the product antisense oligonucleotides can be used as probes for identifying the presence of specific mRNA transcripts in in situ hybridization assays, which does not involve administering

Attorney Docket No.: RTS-0343
Inventors: Cowser and Frier
Serial No.: 10/023,782
Filing Date: December 17, 2001
Page 3

antisense oligonucleotides to cells, tissues, or whole animals as present in Group II.

Applicants respectfully traverse this restriction requirement.

The criteria which must be met for a restriction requirement to be proper are set forth in MPEP §803 and include: (1) that the inventions be independent or distinct and (2) that there would be a serious burden on the Examiner if the restriction is not required. MPEP 802.01 defines "distinct" to mean that the "two or more subjects as disclosed are related, for example, as combination and part (subcombination) thereof, process and apparatus for its practice, process and product made there, etc., but are capable of separate manufacture, use, or sale, as claimed, AND ARE PATENTABLE (novel and unobvious) OVER EACH OTHER."

Clearly, the two suggested groupings in this application contain claims with the same elements or technical features, namely, a compound targeted to TFAP2C. Furthermore, the claims identified in Group II are dependent claims upon claim 1. Thus, by their very dependency they are as a matter of both fact and law related.

Attorney Docket No.: RTS-0343
Inventors: Cowser and Frier
Serial No.: 10/023,782
Filing Date: December 17, 2001
Page 4

Further yet, there would be no additional search burden on the Examiner if the restriction is not made. Clearly any search performed to identify art relating to a compound targeted to TFAP2C would also identify relevant art to any methods of inhibiting the expression of TFAP2C using compounds targeted TFAP2C.

Accordingly, since the instant restriction requirement fails to meet either of the two criteria for proper restriction, withdrawal of the requirement is respectfully requested. It is therefore respectfully requested the pending claims 1-20 be allowed to remain in the instant application for prosecution.

However, in an earnest effort to be fully responsive in the event that the restriction requirement is not withdrawn, and to further facilitate prosecution, Applicants elect Group I, claims 1-14, drawn to compounds targeted to TFAP2C, with traverse.

Respectfully submitted,

Jane Massey Licata
